PRINCIPAL'S CORNER

PROF.V.K.PALIWAL

Professor VK Paliwal, Ph.D., the esteemed principal of our college, has been a valuable support for Finanza. He is currently the officiating principal of Dyal Singh College, University of Delhi . He has been a valuable support for our society Finanza.

He was felicitated with the full bright Nehru Senior Research Scholarship, USA in 2010-11. He has been awarded the best Ph.D. thesis award in Material Sciences-G. C. Jain Memorial Prize in 2005. He has published numerous articles in national and international journals and attended several conferences as well.

Team Finanza is elated to work and learn under his supervision and guidance. We sincerely thank Sir for his unconditional support and guidance.

**Team Finanza
Session 2022-23**

FROM OUR MENTOR'S DESK **DR. RITA NAGPAL** (TIC , FINANZA)

Finanza, the finance society of Dyal Singh College is a voluntary group of students aiming to disseminate quintessential knowledge on finance and related aspects through the conduct of its activities throughout the year. Since its inception in 2015, society has traversed a great path to grow in size, scope and shape to make it more engaging for its members and community. Members of society have diversified themselves in all manners. Be it organising multifarious events or hosting regular speaker sessions with eminent personalities, the society has managed to build a reputation of its own.

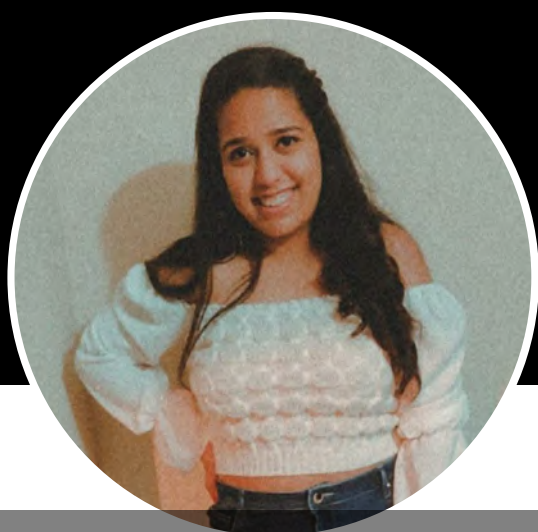

With each new edition of the newsletter, I hope that our society creates the best content for you to make it not only informative but also interesting and relatable. Society promises to be unfettered in efforts to make finance easy and simple for you. With the hope that these pieces help you enhance your knowledge, I wish that you have a pleasant reading experience.

ANURAG TEWARI

PRESIDENT

2022 - 23

PUNITA PUNANI

Finanza has always been a bunch of enthusiastic individuals who have strived to impart knowledge in the most simple yet effective manner. Our efforts are aligned with our vision of enhancing the financial intelligence of the youth. We strive to create an environment where people can grow and learn to lead their lives as more socially and financially responsible individuals. Stay safe! Stay informed!

FINANCIAL ENTREPRENEUR

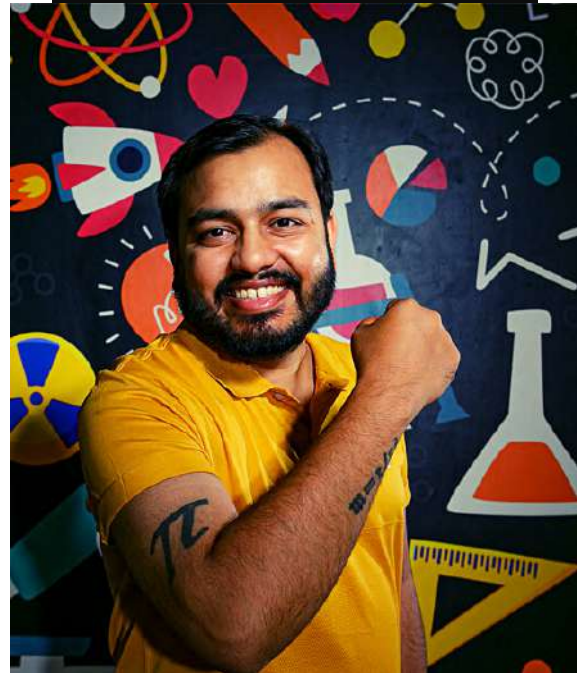

Alakh Pandey, a.k.a. Physics Wallah, is one of the most well-known instructors on YouTube. His YouTube channel, which has 5 million members, offers instructive films for kids getting ready for engineering and medical entrance exams that include Science courses in the 11th and 12th grades (jee and neet aspirants).

His relationship with teaching beginning

He began when he was forced to move into a slum and live in a rented home. While still enrolled in sixth grade, he began tutoring pupils in the fourth grade. He attended a coaching institute's demo class as an 11th grader. No one imagined the demo class's outcome, as the students enthusiastically praised his method of instruction.

Let's look into his Journey!!!

Let's look at his educational background!

He graduated from Bishop Johnson School and College in Prayagraj in 2010 with an intermediate degree. He later passed the engineering entrance exam owing to his own self-study and preparation and was awarded admission at HBTI-Kanpur. He left it though and went back to his hometown of Allahabad. There he started teaching in a coaching institute, imparting knowledge.

2016, was a changing year for him, keep reading to know how?

He started the YouTube channel "Physics Wallah" in 2016 in an effort to connect with more students around the globe. He began posting films that explained various high school physics and chemistry concepts. 2.5 M subscribers were acquired in the first 4 years. He collected INR 8000 in January 2018 when a buddy of his gave him advice to monetize his YouTube account. He eventually stopped coaching in an effort to concentrate entirely on YouTube in order to reach more pupils.

Want to know why PhysicsWallah was chosen as his username?

According to Pandey, the name was influenced by the well-known ChaiWallah tea shop, which is present in Kanpur, Lucknow, and Varanasi. When Pandey discovered the name, he was in Kanpur with his sister.

The launching of the App

On 26th May 2020 a mobile app was launched delivering comprehensive NEET and JEE courses. It conducts tests and clarifies questions through a paid subscription model with a minimum price of Rs. 1000. The app gained popularity seeing 50K downloads on the first day itself. Today, 5 million or more downloads are counted, and they account for 95% of PW's income.

Next Big Growth 2022

PW just secured its \$100 million initial round from WestBridge Capital and GSV Ventures, raising its worth to over \$1 billion and making it the sixth unicorn in the edtech sector. It saw growth at an impressive rate, clocking Rs 350 crore revenue in the financial year with a reported nine-fold increase in 2022, having a 60% EBITDA margin.

The next step in this success ladder

PW's Hybrid classes, also known as PW Pathshalas, are already in use in 18 Indian cities. The platform has opened PW Vidyapeeth, its first entirely offline location, in Kota, Rajasthan. By 2025, PW hopes to have more than 250 million students using the platform. His current drive is to serve more students and give them the support they need to succeed in life.

PERSONAL FINANCE

Overdraft Facility, a better alternative?

" Finding yourself in a situation of borrowing?
And going with the personal loans?
Then wait and read this one out. "

Overdraft facility is best for those facing frequent short-term cash flow mismatches but who can repay the borrowed sum in a very short period of time. Adhil Shetty, CEO, Bankbazaar.com, say "It is similar to revolving credit such as credit cards where you can use credit to a given limit, pay back your dues, and have your credit limit restored,"

PERSONAL LOAN OR OVERDRAFT, WHICH ONE TO GO WITH?

In contrast to personal loans, which carry interest starting on the day the money is disbursed, one of the major benefits of an overdraft facility is that it only applies to the amount that is withdrawn.

Every time a borrower asks for a personal loan, the lender will review their history and confirm their documentation.

In the event of an overdraft, the paperwork is completed just once, and the borrower is permitted to withdraw funds many times from the same account up to the overdraft sanctioned amount.

OVERDRAFT RULES!

- *An account holder may remove more money from his bank account than is actually available.
- *The bank establishes the credit limit based on the balance of the account holder.
- *The amount of the overdraft and the length of the overdraft determine the interest rate.
- *Borrowers are permitted to withdraw the sanctioned limit in any amount several times.

WHAT IS A BETTER OPTION?

Borrowers should choose a personal loan overdraft facility if they have the ability to repay the borrowed amount in full in a short amount of time, such as less than three months.

Credit cards could also be helpful for those who are salaried. A self-employed person who needs cash flow flexibility may find a loan with an overdraft helpful.

Just remember!

As a borrower, you should exercise caution since uncontrolled borrowing can result in a debt trap because the interest will keep accruing. **READ MORE**

De-dollarization of global economy

But why De-dollarise the World today?

But is it the time to replace the dollar with an alternative to fuel the global economic engine?

1st reason- Strong sentiments against the US dollar due to the power of sanctions it uses is the primary reason as to why the world needs to de-dollarize. For example US planned to cut Russia from SWIFT so as to cut them from global financial system. This move was only possible because maximum SWIFT transactions are done in dollars. However this move also goes against the principles of SWIFT as it was never to be dragged in international politics. This tool was already utilized by US on Iran which caused it a massive economic loss.

2nd reason- USA is a consumer-based society which maximises imports. This is the reason that its 23 trillion dollars GDP is not enough to sustain its living standards. This is why USA continues to take on more and more debt. At present America is the largest debtor nation with a debt of 30 trillion dollars. This is why US can provide high living standards and massive tax cuts to its citizens however because of this the countries that invest their money in US economy due to security suffer from less capital in their respective domestic markets. This model benefitted both the countries earlier but this is not the case now.

3rd reason- The American economy is printing excessive money today. When a country prints more and more money, its debt increases further at a faster rate. The covid-19 pandemic served as a catalyst in this crisis as the US to stop its economy from collapsing, printed excessive amounts of currency. So much money was printed that 40% of existing US dollars are printed during the covid pandemic. Inflation in US is breaking records. This increase in inflation gives rise to higher interest rates in banks so if any country takes a loan from US it will have to pay a very large amount of interest.

Challenge to the American crown:

The Chinese Yuan has emerged as the only currency that can prove to be a tough contender against the US Dollar. After China stepped in WTO it has never looked back as it has replaced US in EU, South America and the African countries as the largest supplier in goods and services.

China is world's largest manufacturer exporter and its economy size is so massive that it is challenging the US economy. On the other hand the US is receding on both of these parameters. China is the largest trade partner of around 125 countries and if China manages to convince its partners to trade in Yuan, then very soon it can become the main reserve currency in the world.

One move that China has against the US dollar's might is selling all of its dollar reserve in the market. This would lead to an instant reduction in the value of dollar. However as of now this move will be self-destructive for China as it's currency will lose value too because as a consequence the US will stop trading with the Chinese economy. However when China becomes successful in building a strong financial system like the US nothing will stop it from using this tool.

Also check out this video : [Finanza.dsc](https://www.youtube.com/watch?v=Finanza.dsc)

De-dollarization of global economy

Moves In Favour of Yuan:

1. India's largest cement company is dealing with a massive Russian coal company in Yuan
2. To bypass the recent sanctions put up by US against Russia, India is trading with Russia in Yuan. Moreover talks are going on conduct trade in terms of Ruble-Rupee.
3. Saudi Arabia has even accepted China's payments in Yuan instead of dollars recently.
4. China is even insisting all Asian, African and Latin American countries to trade in Yuan instead of dollars.

Challenges to Yuan's global acceptance:

The 2 things that China needs now are-

1. Getting International support: China either needs support of the international community or it needs to exert massive influence on countries such that they have no other option left than to support it.
2. Building a monetary system in which there is no dollar dominance: For example international currency can be returned by multiple commodities or currencies instead of just gold or dollars. Russia and China are working together in building such a model

The biggest issue that arises is of Trust. Countries have been trusting the US economy since a long time as despite putting up sanctions the dollar is viewed as the currency which does least discrimination between domestic residents and foreigners. On the other hand China is being seen with a lot of suspicion. China is viewed as the origin of the covid pandemic, it has become famous for its authoritarian government's debt trap diplomacy and its aggression can be seen in the way that it deals with its bordering countries. So even though countries are preferring Yuan in this crisis, but how effective it will be in the long term is doubtful and concerning.

Can the Indian rupee compete with the Chinese Yuan as an alternative to US dollar?

The answer is yes but for that to happen India has to make many changes and face many challenges in its way. RBI has taken a massive step in this direction as it built a mechanism to settle international trade in rupees instead of dollars but still India has 3 massive challenges that lie in its path.

Ø The first and foremost challenge is its nominal GDP. The nominal GDP of India today is about 3 trillion dollars while that of China is 16.7 trillion dollars i.e. about 5 times more.

Ø The second challenge is to increase consumer spending. In China it is about 15.7 trillion dollars while in India it is just 1.5 trillion dollars.

Ø The third challenge is income inequality. Indian population faces about 24% more income inequality than its Chinese counterpart.

These factors pull down the Indian economy's chances considerably. But if India boosts its economic growth and transforms itself into a high value market then it can compete with China.

Conclusion:

In terms of use of currency in transactions and global reserves the US dollar is way ahead than Yuan and Rupee. So in the short run the US dollar will be able to maintain its position however it will face serious challenges in the long run. However both currencies need to provide better benefits before the world community to compete with the US Dollar. The US will not lose its hegemony and its privileges without giving a tough fight and the outcomes of this fight will not be peaceful for the global community as a whole. This is not a matter of ifs and buts, it's just a matter of time.

If you look closely the world of finance and investment is filled with facts that will leave you speechless.

Banks are offering best tax-saving FD interest rates

Tax-saving FDs, which have a fixed tenure of five years, give investor the benefit of tax deduction. The interest rate offered on such FDs varies across banks. The DCB bank offers the highest compounded quarterly interest at 6.6% closely followed by IndusInd Bank at 6.5% and 6.3% by the RBL Bank. IDBI First bank offers quarterly interest at flat 6% followed by Karur Vysya Bank at 5.9%.

Sri Lanka is caught in the debt trap

The depleting forex reserves and a rampant dollar have hampered Sri Lanka's ability to service its external debt, which is over \$51 billion. In May this year, the island nation defaulted on its debt repayment – amounting to \$7 billion – for the first time. As per a European Parliament report, "Japan held debt amounting to 4.4 per cent of Sri Lankan GDP, India 1 per cent, Korea 0.5 per cent, Germany and France 0.3 per cent each". Under scrutiny for its 'debt trap' diplomacy, Sri Lanka's debt held by China amounted to 6.9 per cent of the GDP.

Indian Inflation appears to have peaked

While the outlook on price stability is clouded by external conditions, inflation appears to have peaked, RBI's Shaktikanta Das said. Inflation appears to have peaked and it has moderated from 7.8% to 7.04%. Now it is at 7%. So it is a very volatile situation. The governor observed that commodity prices have softened in June, but they are still quite high. Whether they sustain at the current levels or whether they bounce back again or ease off will depend on a number of factors. Das attributed the difficulty in assessing the future trajectory of prices to uncertainties around whether advanced economies are headed towards recession, which could result in demand compression.

FINANCIAL FACTS YOU DIDN'T KNOW

Social Security benefits for married people in US

There are three potential Social Security benefits for married people: the one based on an individual's own work history; a spousal benefit, which can be up to 50% of what a higher-earning spouse receives at full retirement age (67 for those born in 1960 or later); or a survivor benefit worth up to 100% of a deceased spouse's last payment. You are entitled to only one benefit -- whichever is higher -- at a time, and you can claim a spousal benefit only if your spouse has filed for Social Security.

Real state expenditure on education declining in North Carolina

When it comes to educational finance, North Carolina has a long history of deviating from national norms. Since the 1930s, we've funded public schools primarily at the state level, while in most places local funding plays a bigger role. State revenue makes up about 62% of school funding in North Carolina and local revenue only 28%. For the nation as a whole, those two shares are 47% and 46%. While state expenditures on K-12 and community colleges have been on the rise in recent years, after adjusting for enrollment and inflation, that's not the case for the UNC system. At \$13,126 per full-time student in 2020-21, state funding for UNC is about 20% lower than it was before the onset of the Great Recession.

Gap between college costs and financial aid is growing in US' Missouri

College tuition and fees have increased 900 percent since 1980 in Missouri, but access to financial aid isn't keeping up. As a result of the growing gap between college costs and financial aid, students borrowed an average of \$36,510 to finance their education in 2021, according to the report, which is more than double what students would pay in 2000. And when financial aid and loans weren't enough, students simply didn't buy class materials.

INDIA

RBI liberalises norms to boost forex inflows:

The Reserve Bank of India announced measures to diversify and expand the sources of forex funding with an aim to mitigate volatility and dampen global spillovers, including letting foreign investors invest in short-term corporate debt and allowing the purchase of more government securities under the fully accessible route.

The aim is to shore up falling Rupee.

The measures taken by the central bank come against the backdrop of the Rupee depreciating by 4.1% against the US dollar during the current financial year so far (up to July 5) amid the ongoing geopolitical tensions [READ MORE](#)

Twitter sues Indian Government?

Twitter is seeking to overturn some of the orders by the Indian government to take down content from its platform in a legal challenge that alleges abuse of power by officials, a source familiar with the matter said.

Twitter has been asked by the Indian authorities over the past year to act on content, including accounts supportive of an independent Sikh state and dozens of tweets that were critical of the government's handling of the COVID-19 pandemic.

The Indian government has previously said that big social media firms, including Twitter, have not complied with removal requests, despite their legal standing. [READ MORE](#)

Finance ministry releases Revenue Deficit grant:

The Department of Expenditure, Finance Ministry on Wednesday released the 4th monthly installment of the Post Devolution Revenue Deficit (PDRD) grant of Rs 7,183.42 crore to 14 states.

The Fifteenth Finance Commission has recommended a total PDRD grant of Rs. 86,201 crores to 14 states for the ongoing fiscal. The recommended grant is released by the department in 12 equated monthly instalments. [READ MORE](#)

PM to launch SGX Nifty trade at GIFT:

Nifty futures contracts on Singapore Exchange (SGX) are set to start trading at the International Financial Service Centre (IFSC) in Gandhinagar as Prime Minister Narendra Modi will launch the dollar-denominated Nifty futures and inaugurate the India International Bullion Exchange (IIBX) at the Gujarat International Finance Tec (GIFT) City, said people familiar with the matter.

National Stock Exchange and SGX have formed a special purpose vehicle (SPV) - NSE International Financial Service Centre (IFSC)-SGX Connect - to launch Nifty products at the Gift City. SGX Nifty Futures will be traded at GIFT city for close to 19 hours a day. [READ MORE](#)

New wheat-flour export policy:

India imposed restrictions on outbound shipments of wheat flour (atta), refined flour (maida) and semolina (rava/sirgi), in a move aimed at containing price rise.

New Delhi had banned wheat exports in May. Exporters of these commodities would now need approval of the inter-ministerial committee on export of wheat for shipments from July 12. Export policy of wheat flour (atta) remains free but export shall be subject to recommendation of the inter-ministerial committee on export of wheat. [READ MORE](#)

Flag carriers of India's neighbours are dangerously close to crisis — can they be rescued?

Delays in plane and engine deliveries are giving airline CEOs across the world sleepless nights, as they try to cope with a rapid bounce back in air travel demand after two years of the Covid-19 pandemic.

But they are the least of Richard Nuttall's worries. Sri Lankan Airlines' CEO of seven months has much graver issues to grapple with: where the airline will get fuel to fly its planes; whether there's enough cash to run its operations for the next few weeks; and most critically, with an economically crippled government unable to support it and hoping to privatize it, how soon will the airline get a new owner? [READ MORE](#)

INDIA

India unable to afford a healthy diet

According to a survey by the Food and Agricultural Organization of the United Nations, 70.5 percent of people in India are unable to afford a balanced meal, making it one of the highest percentages.

Child nutrition is an issue in our country where child wasting [insufficient nutrient intake] as well as the prevalence of stunting (being underdeveloped for one's age) are not that great. There is a need of the hour to provide a nutritious diet to the most vulnerable sections of the population but to also make it affordable. [READ MORE](#)

Restrictions imposed on 4 cooperative banks

The Reserve Bank of India has placed limitations on four cooperative banks: Saibaba Janata Sahakari Bank, The Suri Friends' Union Co-operative Bank Ltd, Suri (West Bengal), and National Urban Co-operative Bank Ltd, Bahraich.

The RBI imposed withdrawal limits, capping Saibaba Janata Sahakari Bank withdrawals at Rs 20,000 and The Suri Friends' Union Co-operative Bank withdrawals at Rs 50,000, due to their poor financial circumstances.

The withdrawal cap for customers of the National Urban Co-operative Bank has been fixed at Rs 10,000. These limitations are scheduled to last for six months. [READ MORE](#)

India to experience stable growth

The majority of the world's major economies as well as the OECD region as a whole continue to show signs of slowing growth, according to the OECD Composite Leading Indicators (CLIs), which are intended to predict turning points in economic activity relative to trend over the next six to nine months.

According to the Organization for Economic Co-operation and Development, economic growth in China and the United States is predicted to slow down while it is likely to remain stable in India. In the fiscal year 2022-2023, the World Bank has reduced India's GDP growth prediction from 8 percent to 7.5 percent. [READ MORE](#)

China continues to be India's top trading partner

Given that it increased to USD 67.08 billion in the first half of this year amid a significant increase in Chinese exports, the India-China trade is on track to surpass USD 100 billion for the second consecutive year according to the Chinese Foreign Ministry spokesman Zhao Lijian.

He claimed that the discrepancy in trade data released by China and India was due to the use of various statistical measurement scales.

Exports from China to India increased to USD 57.51 billion, up 34.5 percent from last year, while exports from India to China decreased to USD 9.57 billion, down 35.3 percent from the previous year. At the halfway point of the year, the trade imbalance was USD 47.94 billion. [READ MORE](#)

Rise in prices across categories

When comparing price levels from April 2022, a price hike across categories continued unabated in June, led by unprecedented raw material inflation.

Hindustan Unilever (HUL) increased the cost of their soaps by 3-20% in the home and personal care sector. Soap costs have increased between 4 and 19 percent from Godrej Consumer Products (GCPL), Reckitt Benckiser, and Wipro Consumer.

Toothpaste, shampoo, and detergents all saw a rise in prices along with floor cleaners, other oral care, deodorants/air fresheners, and home insecticides, according to a report by Kotak Institutional Equities (KIE). [READ MORE](#)

An impressive Capital Inflows witnessed by Real Estate in India

The Indian real estate market had a successful quarter in Q2 2022 despite the decline in the economy. Almost all real estate industries reported a significant rise in leasing activity on a yearly and quarterly basis.

Inflows of capital into this industry reached USD 3.4 billion in H1 2022, an increase of 4 percent both annually and biannually.

Nearly 70% of capital inflows in the second quarter of 2022 were used for pure investment or acquisition purposes, and 30% were allotted to development or greenfield projects. Some of the observations made include: RE Investment Outlook, Industrial & Logistics: Resilient sector positioned for prolonged development, and Retail: Sector back on a growth track. [READ MORE](#)

WORLD

Crude oil prices at a 3-month low

Ever since the conflict broke out in Ukraine, the supply chain disruptions in oil have persisted, causing a rapid rise in crude oil and other essential commodities' prices. Prior to the conflict, crude oil was around USD 90 per barrel and rose to as high as USD 115 in less than a week in late February.

A brief decline in prices was observed at the end of March, and it went below USD 100 at the beginning of April. The latest fall in prices could be attributed to rising fears of a possible recession, along with the aggressive monetary policy tightening by various central banks. These factors are essentially leading to weaker demand for crude oil, and thereby contributing to the fall in their prices. In India, retail inflation has been over the Reserve Bank of India's upper tolerance band of 6 per cent for the sixth consecutive month in a row in June. [READ MORE](#)

Trade restrictions are inflaming the worst food crisis in a decade

The price of wheat, a key staple in many developing countries, has shot up by 34 percent since the Russian invasion of Ukraine in late February. Other food costs have also risen. In response, as of early June, 34 countries had imposed restrictions on exports on food and fertilizers – a figure approaching the 36 countries that used such controls during the food crisis of 2008-2012. These actions are self-defeating because they reduce global supply, driving food prices even higher. Other countries respond by imposing restrictions of their own, fueling an escalating cycle of trade actions that have a multiplier effect on prices.

Everyone is squeezed by food price inflation, but the poor are the hardest hit, especially in developing countries.

This time, the war in Ukraine is accelerating a price surge that started earlier as a result of unfavourable weather in key producing countries, the rapid economic recovery after the COVID-19 induced slump, and the growing costs of energy and fertilizers. The war has severely disrupted shipments from Ukraine, one of the world's largest food suppliers. [READ MORE](#)

Pakistan stares at serious economic crisis amid fast-depleting forex reserves

Cash-starved Pakistan could face a serious economic problem as its foreign exchange reserves are depleting fast amid rising external debt servicing. The country's external debt servicing rose to USD 10.886 billion in the first three quarters of 2021-22 compared to USD 13.38 billion in the entire FY21. It was just USD 1.653 billion in 1QFY22 against USD 3.51 billion in the first quarter of 2020-21, but it jumped to USD 4.357 billion in 2QFY22 and to USD 4.875 billion in 3QFY22.

The country has been facing a serious threat from its external front as the State Bank of Pakistan's foreign exchange reserves fell to single digits despite a USD 2.3 billion inflow from China late last month, the Dawn newspaper reported. "The increasing size of the external debt servicing in each quarter indicates the government has been borrowing dollars at higher commercial rates to meet its foreign debt repayment obligations," the report said. Egypt's Suez Canal revenue hits \$7 billions!

Egypt's Suez Canal revenue hit a record high of \$7 billion in the financial year to June 30, up 20.7% from the previous year, Canal Authority Chairman Osama Rabea said. The authority attributed this rise to an increase in vessel numbers and cargoes, with total cargoes reaching a record high of 1.32 million tonnes, up 10.9% from 2020-21. Also, the number of vessels transiting the canal rose 15.7% to 22,032.

The canal is the fastest shipping route between Europe and Asia and one of the Egyptian government's main sources of foreign currency. [READ MORE](#)

SC sentences Mallya to 4-month jail, fines him Rs 2,000

The Supreme Court on Monday sentenced fugitive businessman Vijay Mallya, who was found guilty of contempt of court in 2017, to four months' imprisonment and also fined him Rs 2,000.

A bench presided by Justice U U Lalit also held as "void and inoperative" the transactions by which Mallya transferred (US) \$40 million, received from British firm Diageo, to his three children — son Siddharth Mallya and daughters Leanna Mallya and Tanya Mallya — and said he "shall be bound to deposit the amount received by such beneficiaries along with interest at the rate of 8 per cent per annum with the concerned Recovery Officer within four weeks".

The top court had held Mallya guilty of contempt on two counts on May 9, 2017 – for disobeying its order to fully disclose his assets and for violating a Karnataka High Court order restraining him from alienating his assets. [READ MORE](#)

Is it right time for ITC's hotel business de-merger?

While ITC has said that an alternative structure for its hotels business is "very much on the table", analysts said this is the "right time" for the diversified conglomerate to look at unlocking value in this business, as the hospitality industry is expected to witness a strong recovery this fiscal after Covid hiatus. The cigarette-to-soap maker had also talked about "exploring" alternative structures for its hotels' segment before the coronavirus outbreak.

As of now, bouncing back of the country's hospitality industry surpassing pre-pandemic levels is a positive factor. Moreover the average Room Rate has improved over the last fiscal too. [READ MORE](#)

Lamborghini launches limited edition Aventador Ultimae Coupé in India

Italian supercar maker Automobili Lamborghini on Wednesday launched the Aventador Ultimae Coupe in India, weeks after it showcased the limited edition Aventador LP 780-4 Ultimae Roadster in the domestic market. The company said it will make only 350 units of the Ultimae Coupe and 250 of the Roadster globally. Lamborghini, however, did not disclose the prices of the Aventador Ultimae Coupe.

The Aventador LP 780-4 Ultimae Coupe comes in a single-tone, purple configuration, with lines and details such as the front splitter's outline and 'teeth' picked out in purple, among others, the company said.

Google announces Startup School India initiative

Google on Wednesday announced an initiative, Startup School India, that aims to organise accumulated knowledge into a structured curriculum to enable startups in small cities overcome various challenges. Google hopes that the programme will help 10,000 startups in tier 2 and tier 3 cities (smaller cities). The nine-week programme, delivered virtually, will have interactions between Google leaders and collaborators from across the startup ecosystem, spanning fintech, business-to-business and business-to-consumer e-commerce, language, social media and networking, job search and other areas.

The curriculum will feature instructional modules on subjects such as shaping an effective product strategy, deep dives on product user value, building apps for next billion users in markets like India, driving user acquisition among others. [READ MORE](#)

60 Start-ups tie up with ISRO for space debris management

'Breaking the taboos of the past', almost 60 Space Startups have registered with the Indian Space Research Organisation (ISRO) to foray deep into innovations in space debris management, nano satellites, launch vehicles and more, Union Minister of State for Science and Technology Jitendra Singh said.

Singh was in Bengaluru to inaugurate the ISRO System for Safe & Sustainable Operation (IS4OM) at the ISRO Control Centre. ISROM is designed to support all routine operations safeguarding Indian space assets and mitigating collision threats from space objects through specific collision-avoidance manoeuvres. Highlighting the risks associated with space debris and collisions, Singh noted that in 1957, there were only two debris hovering in space over the country, while today that number has skyrocketed to over 25,000. Internationalizing Rupees

Among the drifting economies and shifting governments, the year has observed plethora of transformations. Since the start of Russia-Ukraine war, the money has never become stable and the crisis are becoming severe for not just the two countries but hundreds of economies out there, directly or hidden. With the season of revolutions, Reserve Bank of India has introduced its policy to internationalize Indian National Rupee (INR) and set global platforms for trade with it.

Until now, the trade was supposed to be made in the currency that is convertible, US Dollars, European Euro, are to name few. However, the initiative of RBI now allows Indian Rupee to act as exchange between the two-country trade. This gives INR a face of its own. The mechanism is not applicable with the maritime countries initially, but the small counties like Sri-Lanka, which is temporarily not in a position to trade with high priced Dollars/Euros, can obviously make trade relations with India, to buy Indian products with it. For the system to fall in place, the first step would be encouraging countries to allow the rupee in their trust. Once done, both the countries would require to open a back account- called Vostro accounts- in each other's state to maintain reserves in local currencies. Once the trade is established, the first party, buyer, would initiate payments in its local currency, which then gets converted in the currency of second country, using the rate that flourishes in the market. This makes both the Indian exporters and Indian importers to initiate in INR

As the INR gradually falls when compared with USD, the RBI, with this system, RBI attempts to increase the demands of rupee when foreign traders accepting rupee, which would gradually add value to the fallen Currency.

One of the first countries to use this mechanism lately could be Russia. Russia enjoys trade surplus with India. India's import of Russian oil has increased significantly over the span of few months. It holds 2-3 billion dollars trade deficit with the country at the current date. Imaging the payments getting settled with the system of the rupee settlement, it would be not much complicated and a hard money outflow for India as Russia will be accepting the rupee assets, which it may later invest in the bonds of Indian govt/ development programs. Moreover, after Russia's expelled from the international swift Trade system, Russia and India could now trade without USD, in India's very own currency.

Hence, the idea is to promote growth of Indian rupee and help in establishing global trust in the national currency. With the plan all set, the uncertainty about the future success with it lies with the time to come.

ANSWER TO JUNE EDITION

NOTE: ANSWERS WILL BE IN UPCOMING EDITION

NETFLIX: grappling with its most serious slowdown in years:

You know the business is not booming when the biggest or only source of your revenue has become sore and customers are looking for alternatives.

Similar, thing has happened to Netflix where, it lost nearly 970,000 paid subscribers in the June quarter. Netflix's subscriber loss was expected but it remains a sore point for a company that is wholly dependent on subscription revenue from consumers. The firm's share price has dropped more than 60% so far this year, as investors sour on its prospects.

Netflix but no chill to the company. Although Netflix has said it will jumpstart growth with a new ads-supported service and by clamping down on password sharing - which one study estimated was costing Netflix \$6bn a year.

Amazon Prime Video signs content deal with HBO Max :

Amazon Prime Video has signed a content syndication deal with Warner Bros. Discovery to offer a slate of 11 HBO Max Original series and 10 HBO Max original features exclusively on the service for Prime members in India.

So, more content available to Indian subscribers.

The slate includes series across genres, Primetime Emmy-nominated series, original pop culture classic series and also includes college-set comedy, drama and superhero series.

Is Bollywood at a threat?

Bollywood has a serious rival now in India. It's bigger, louder and is making more money than its prolific, glitzy Hindi-language cousin known for its signature dance moves and opulent wedding scenes, yes you guessed it right, it is the epic, big-budget, over-the-top action flicks, south Indian films or the Tollywood industry.

These films are increasingly dominating the country's \$24 billion media and entertainment market, and in some cases, making their mark beyond India.

The success, indicative of a power shift toward the country's south, comes at a time when Bollywood is reeling from a string of flops, as its increasingly westernized content limits its appeal to a mostly urban audience. [READ MORE](#)

Top Gun Maverick: Current highest grossing movie:

That's right folks, the Tom Cruise era is back.

Tom Cruise's latest action drama 'Top Gun: Maverick' continues to rule at the box office. The film that was released on May 27 in the US has reportedly surpassed the collection of The Avengers. The movie has earned a whopping USD 623.8 million in the US alone becoming the highest-grossing film of all time in the US.

'Top Gun: Maverick' has also overtaken James Cameron's Titanic when it comes to the domestic collection and Michael Bay's 'Transformer: Age of Extinction' [READ MORE](#)

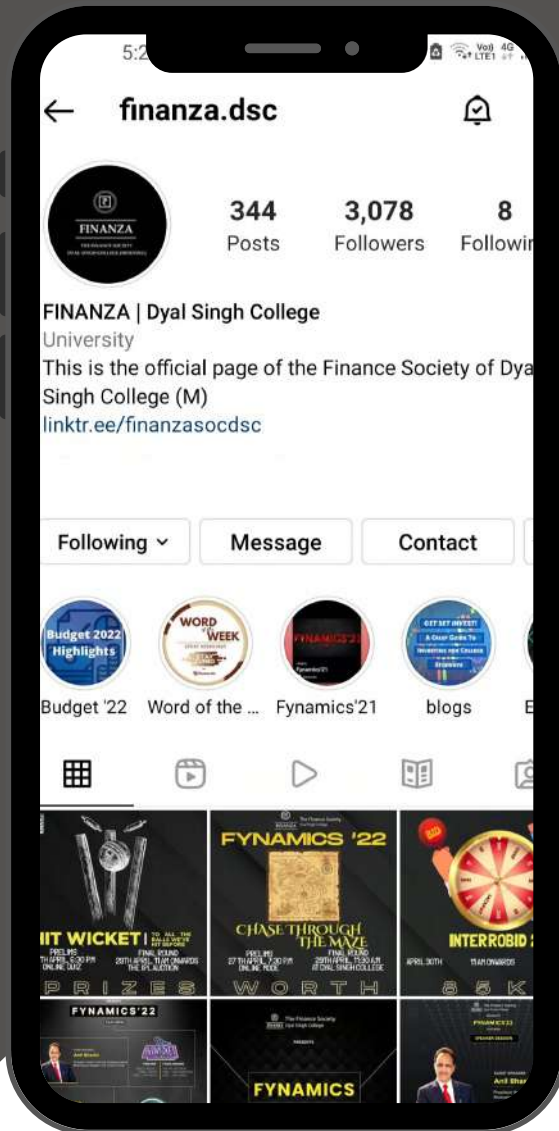

Indian media, entertainment industry: On a consistent growth:

The Indian media and entertainment industry is expected to grow at a CAGR of 8.8 per cent and reach Rs 4.30 lakh crore by 2026, according to a report by global consultancy firm PwC.

The growth would be paced by digital media and advertising through deeper penetration of the internet and mobile devices in the domestic market, along with traditional media, which will hold their steady growth, the report said.
